Dear TLCD,

Thank you for taking the time and allowing our school to learn about architecture. I want to thank Dylan and Domenica for taking their time and presenting a powerpoint to us. I want to also thank Dylan for showing us the green roof and Domenica for showing us the samples of materials used to make the new Kaiser hospital. I want to thank Cindy for being so kind and treating us nicely as soon as we got there and also when we were leaving. I also want to thank Guy and Don for showing us the powerpoint of the buildings. I also want to thank Guy and Don for letting us try out the software and showing us some real designs they made. After all, I want to say thank you to everyone for being so kind and not being bothered by us coming in the building to see all the cool stuff. Before I went to this educational trip, I thought architecture was boring and didn't interest me. Now, however, I feel completely different. I now want to learn more about architecture.

Sincerely,
Derian

Dear ~~Mr. [unclear]~~,
Thank you for taking the time
and allowing our school to
learn about architecture! I ^{presentate}
really enjoyed the ~~presentations~~
and all of the materials you used
to make buildings. I really liked the old
courthouse square idea. I think
the museum is going to be
a big hit. The RUP idea
is going to be cool. You guys should
make it really big and nice. I hope
I become an architect someday. It
must be a great honor to design things
that are really popular. The interior design
thing was really interesting.

Thanks for showing us the
green roof, it was very very cool.
You all were very kind. You guys
should design a skatepark because ~~it~~
~~is~~ all the other parks are
to far away. Lastly I would like
to say the solar power roof is a
good way to save energy. Thank you again
and I hope to see you all again soon.

Sincerely,

Jose

Dear TLCD

I want to thank you guys for taking the time of a work day, you guys could be doing something important but you decided to talk to us how great TLCD is. you guys are amazing because how I think that ~~being~~^{being} an architect is really cool ~~how~~ how I think I am ready to work to be an architect.

I want to thank Don tamassi because he is the owner and he decided that we can come and learn stuff but he teach us what they are working on what they already design and what they are going to be working in the future.

I want to thank Doménica for teaching us about interior design because I think that's really interesting and I wanted to know more about that and how I do I want to thank Dylan chavez because he talk to us about his life and it's interesting that he went to Oregon state and I like TLCD a lot.

I think everybody that works in the office is lucky because that job is awesome and I am thinking about becoming an architect when I grow up and thanks for everything you guys.

Sincerely Jose

Dear TLCD,

Thankyou for taking the time and allowing our school to learn about architecture!! you guys are so awesome!! I just want to say thankyou for teaching R.A.M.s a little bit about your guys' jobs.

My brother really wants to become an architect when he's older, so I thought it would be a good idea to go to TLCD and tell him a little bit about you guys. I hope he gets a chance to work with you guys when he's older.

once again, thankyou for taking your time and teaching us about architecture. I hope we did a good job listening and being respectful to you guys. I really hope one of these days I get a chance to look at the new R.U.P. sketches. I know you guys will do an amazing job on it, I bet it will look really pretty. Thanks TLCD, you guys rock!!

Sincerely,
Lupita

francisco

Dear TLCD

Thank you for taking your time and allowing our school to learn about architecture... Thank you for showing us the garage door and the computer design and showing us what you need for to be a architecture, like how you need 4-5 year bachelor or master degree in interior design or interior architecture. Like interior design, resident, kitchen design, hospitality design, sustainable architecture. Also you need 8 years to be a architecture. Also thank you Guy messink amy, DON, Daniela for taking your time from your jobs for teaching us all about architecture. The things that i liked was the chairs next to the garage door they are very comfortable, and i like the garage door even though it doesn't have a sensor on it... I liked the green room also, the thing i don't like was i don't got the chance to see the garden room, well thank you for the tour

Sincerely
Francisco

Dear TLCD,

Thank you for taking the time and allowing our school to learn about architecture. The tour was really cool and fun just how our teachers told us it would be. Thank you to Don Tommassi, Guy Messink, Dylan Chavez, Domenica, and Cindy.

I am really glad I went, because I got to learn really cool things. For example I got to learn about architecture of course. Also how when you build something you don't want too much light or shade.

I really liked seeing the virtual models, and the other models they looked really cool. They also looked useful for a architect.

What I enjoyed the most was how they get to choose the furniture. They make it look really comfortable and welcoming.

Thank you all once again for letting our school go to TLCD. It was really fun to go there. I hope I can go there again sometime.

Sincerely,

Abigail
